Enter your interested thesaurus: `2`
Let get started: **instead**
If you know this word, please click yes, If not, click no [Yes] [No]

This is our first version. It is able to choose which thesaurus the user would like to test. At this stage , it only have few words. We are going to extend it to a large number of words at later stage. It can calculate how many words the user know and how many the user may not learn. We stall have some functions haven't implemented yet. This bot can help people to learn English. Therefore, we think it is meaning and helpful.
